|) _{‡a} | Bug | Radar Station - January 1951 | | | | |
| | a. [| On the Bug peninsula at a point 50 meters north of the Forsthaus Bug, a radar installation has been erected near the track which rums down the peninsula. the installation was probably erected in August 1950. | 50X1-HUM 50X1-HUM | | | |
| | b. | One officer and eight enlisted men were observed moving about the area and between the installation and the Forsthaus. they were a party of marines on detachment from Sassnitz and were responsible for operating the radar station. | 50X1-HUM 50X1-HUM | | | |
| | e. | On 4 January 1957 the radar installation was in operatio, and both the upper and lower cross pieces were observed to rotate. The sound of a two stroke motor was heard coming from the rear of the house, and two insulated cables were seen which ran from the house to the | | | | |
| | | installation. | 50X1-HUM | | | |
| | Binz/Ruegen Radar Station - November 1950 | | | | | |
| | a. | On 12 November 1950, a party consisting of one naval officer and seven enlisted men arrived on the Fahrenberg near Binz/Ruegen and set up a radar installation which was put into immediate operation. | | | | |
| | | <u> </u> | 50X1-HUM | | | |
| | b, | A house about 100 meters north of the installation was requisitioned and used by the Russian naval party as an operating station and living quarters. Two insulated cables run from this house to the installation and the sound of a two-stroke engine can often be heard coming from the house. | | | | |
| | Ç. | The lower arm of the set was seen to revolve 360° on six different occasions. Ten dipoles were counted. | | | | |
| | d. | On the six days it was kept under observation, no vehicles were seen to approach the installation.*** | | | | |
